Rob Burgess, President California Commercial Properties 3195 Danville Blvd. Alamo, CA 94507

RE: Phase I Environmental Site Assessment

728 South State Street Ukiah, California 95482

ALFA Environmental Assessment Services is pleased to provide you with the attached Phase I Environmental Site Assessment (ESA) for the above referenced subject site (hereafter referred to as the "Property"). This Phase I ESA conforms to the scope and limitations of the ASTM Practice E1527-13 Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process. The work performed for this project included a professional site reconnaissance; interviews with owners, operators and occupants; and detailed research of regulatory agency files, aerial photographs, historical maps, and a review of the regulatory environmental database listings for the Property and surrounding area.

"I, Valentin Constantinescu, declare that, to the best of my professional knowledge and belief, I meet the definition of *Environmental Professional* as defined in 312.10 of 40 CFR 312", and "I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed All Appropriate Inquiries (AAI) in conformance with the standards and practices set forth in 40CFR Part 312."

Sincerely,

ALFA Environmental Assessment Services

Valentin Constantinescu, PG

EPA-Compliant Environmental Professional {40 CFR Part 312}

Valentin Company

EXECUTIVE SUMMARY

We have performed a Phase I Environmental Site Assessment in conformance with the

scope and limitations of ASTM Practice E 1527-13 of the Property located at

728 South State Street in Ukiah, Mendocino County, California. Any exceptions to, or

deletions from, this practice are described in this report.

The Property is located on the west side of S. State Street within a commercial/residential

area of Ukiah, Mendocino County, California. The Property is currently occupied by Beverly's, a fabrics, craft, and home decor store for commercial use. The Property totals

approximately 0.43 acre and is occupied by a 7,403 sq ft slab-on-grade commercial

building constructed in 1998. Portions of the Property not occupied by the subject

building consist of asphalt-paved driveways, parking lot, and landscaped areas located

east, and south of the subject building.

Valentina Constantinescu, PM with ALFA Environmental conducted a visual

reconnaissance of the Property for indications of past or present hazardous material

handling or storage activities, which may pose a threat to the surface or subsurface

environment. ALFA inspected all areas of the Property during the site reconnaissance.

Based on historical review of aerial photographs, topographic maps, Sanborn Fire

Insurance Maps, City Directory records, Building Department records, and the EDR 1-mile Radius Report records, in 1941 a small structure, apparently a house existed on the

subject Property area. A commercial structure was noted on subject Property area in the

1950's until 1998 when the structure was demolished and replaced with the current

Beverly's building.

The following sites in the near vicinity are listed on the regulatory agency databases as

having had spills or releases:

LUST Cleanup Site

Cleanup Status: Completed - Case Closed

Phase I ESA Report 728 S State St Ükiah CA The area of the Property slopes towards the south, toward a creek. Therefore, the direction of groundwater flow beneath the Property is inferred to be toward that creek, to the south-southeast, consistent with the topography and creek depicted on historical topographic maps. Based on a review of the Geotracker database, there are nearby Leaking Underground Storage Tank (LUST) cases located far away from the Property that have investigated groundwater.

Based on soil description at nearby sites, sand with some silt was encountered in some soil borings drilled to 30 ft below ground surface (bgs) to the south, and silty clay, silty sand, clayey sand, sandy clay, and clay was encountered in soil borings drilled to 30 ft bgs to the north; groundwater was encountered at approximately 15 ft bgs.

No wastewater treatment facilities are observed or reported on the subject property.

No indication of potentially hazardous material disposal with the solid waste was noted during ALFA reconnaissance. Nonhazardous waste at this site is not considered a significant concern to this investigation.

No on-site water wells or springs were observed during the Property reconnaissance. No groundwater monitoring wells were observed during subject Property reconnaissance.

No settling ponds, lagoons, surface impoundments, wetlands or natural catch basins were observed at the Property during this investigation.

No evidence of water supply, irrigation, oil, injection, underground or aboveground storage tanks or dry wells was observed on the Property.

The subject Property was not identified as a CA Registered UST, CA Leaking UST, and a CA Spills, Leaks, Investigations, and Cleanups site, and/or US RCRA Generator in the regulatory database report.

Phase I ESA Report 728 S State St Ukiah CA

FINDINGS AND OPINIONS

The goal of the processes established by the practice for conducting an environmental site assessment is to identify:

- Recognized environmental condition (REC) refers to the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment. The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions. Conditions that present a REC are those involving hazardous substances/petroleum products that we cannot rule out a release to the subsurface without analytical data, for example: USTs, dry cleaners, industrial/manufacturing, solvent usage, septic system on an industrial property, etc.
- ALFA did not identify any recognized environmental conditions for the subject Property during the course of this assessment.

A total of 65 sites were identified in the regulatory database 1-mile radius report. However, most of these sites are closed cases, located far away from subject Property, cross-gradient or downgradient, permitted USTs, and/or are periodically inspected by regulatory agencies, they do not represent a threat to the subject Property.

Mr. George Lockwood, Chief of the Underground Storage Tank Clean-up and Petitions Department for the California Environmental Protection Agency (EPA) statement presented in the ESA Report regarding information on the State of California's policies concerning properties potentially impacted from off-Site sources of contamination. Mr. Lockwood indicated that under the UST programs guidelines, a property owner or operator is not responsible for contamination that migrates onto their property from an off-Site source unless they refuse to allow access to their property for remediation and clean-up purposes. Mr. Lockwood stated that, even in cases where there is no responsible party to pay for the clean up associated with the LUST, the state has a fund that pays for the clean up cost up to 1.5 million dollars.

Phase I ESA Report 728 S State St Ukiah CA • Historical recognized environmental condition (HREC) refers to a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls.

ALFA did not identify any historical recognized environmental conditions for the subject Property during the course of this assessment.

• Controlled recognized environmental conditions (CREC) refers to a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

ALFA did not identify any controlled recognized environmental conditions for the subject Property during the course of this assessment.

Vapor Encroachment Screening

The Vapor Encroachment Screening (VES) Standard (ASTM E2600-10) may include a two-tiered screening process. Initially, the Tier 1 VES focuses on known or suspected contaminated properties located within the area of concern (AOC). The VES process does not evaluate the potential for vapor intrusion (VI) of subsurface vapors. Evaluation of VI conditions requires field sampling, and is not included in ASTM E1527-13.

As mentioned above, solvents, gasoline, and/or other Volatile Organic Compounds (VOCs) most likely have been used in the last 35+ years and/or are still used off-site.

However, historically no solvents, gasoline, and/or other Volatile Organic Compounds (VOCs) have been used on site, therefore, in accordance with EPA statements, a property owner or operator is not responsible for contamination that migrates onto their property from an off-Site source.

Therefore, the former and/or current on-site operations do not present a vapor encroachment condition to the subject Property.

CONCLUSIONS AND RECOMMENDATIONS

• This assessment has revealed no evidence of recognized environmental conditions or environmental issues in connection with the subject property. Based on the conclusions of this assessment, ALFA recommends no further investigation of the subject property at this time.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Report is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Report includes a search of available city directory data at 5 year intervals.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

APPENDIX C REGULATORY RECORDS DOCUMENTATION

MOTORSPORTS OF UKIAH (T0604500087)

50 ft North

724 STATE STREET, SOUTH UKIAH, CA 95482

LUST Cleanup Site

Cleanup Status: Completed - Case Closed

RB Case #: 1TMC098

SUBSTANCES RELEASED / CONTAMINANT(S) OF CONCERN

WASTE OIL / MOTOR / HYDRAULIC / LUBRICATING

AMERICAN SAVINGS BANK (T0604593339)

250 ft North

700 STATE STREET, SOUTH UKIAH, CA 95482

Cleanup Program Site

Cleanup Status: Open - Inactive

RB Case #: 1NMC279

Prior to 1941 the site was "Auto Camp" and service station, with another former service station, bulk facility, and a truck gas-loading yard located across Gobbi Street just north of the site. After 1995 a Phase 2 investigation was completed that indicated petroleum soil and groundwater contamination on the northeast corner of property.

ARCO #6099 (T0604583804)

410 ft North

696 STATE STREET, SOUTH UKIAH, CA 95482-4027

LUST Cleanup Site

Cleanup Status: Completed - Case Closed

RB Case #: 1TMC575

See the Rite Aid Store #6033 case for information about this site; they are co-located and the Geotracker submittals were made to the Rite Aid case.

RITE AID STORE #6033 (T0604500310)

480 ft North-Northeast

680 STATE STREET, SOUTH UKIAH, CA 95482

Cleanup Program Site

Cleanup Status: Completed - Case Closed

RB Case #: 1NMC378

0.5' - 35' Sand

Soil wet at 15 ft bgs

Fine-grained, grayish orange (10YR 7/4), with some silt, weathered petroleum staining visible between 6.5' and 16.5',

20 slight weathered petroleum odors

This site formerly contained a gas station and a petroleum fuel bulk plant. Petroleum products have impacted soil and groundwater at the site. Excavation of impacted soils occurred during rebuilding of the Rite Aid store. Groundwater monitoring indicated limited impacts. This case and the related ARCO #6099 case were closed in 2014.

EXXON, SOUTH STATE STREET (T0604500234)

170 ft South

734 STATE STREET, SOUTH UKIAH, CA 95482

700 ft South-Southeast

CASH OIL (UKIAH) (T0604564523)

130 CHERRY STREET UKIAH, CA 95482

LUST Cleanup Site

Cleanup Status: Completed - Case Closed

RB Case #: 1TMC542

750 ft Southeast

On September 4, 2002 one 10,000-gallon and one 8,000-gallon underground storage tanks (UST) used for storage of gasoline and the associated tank system were excavated and removed from the property. The property is no longer being used as a gasoline station. Soil samples indicated a release of petroleum hydrocarbons. Subsequent investigation has demonstrated the site meets the case closure criteria specified in the State's Low Threat Uderground Storage Tank Case Closure Policy.

SILTY CLAY, light brown, soft, moist. 8.5 - 13.5 ft bgs

SIL TY SAND, grayish brown, dense. coarse-grained, wet. 13.5 - 18.5 ft bgs

CLAYEY SAND, brown. coarse-grained, trace of gravel, dense, wet 18.5 - 23.5 ft bgs

SANDY CLAY, light brown, stiff, coarse-grained sand, wet. 23.5 - 28.5 ft bgs

CLAY. olive gray, stiff, wet. 28.5 - 32.5 ft bgs

Bottom of hole - 31.5 feet. Groundwater encountered at approximately 15 feet

APPENDIX D INTERVIEW DOCUMENTATION

Key Site Manager Questionnaire

Please provide the following information, if available, before the property visit by ALFA Environmental. The key site manager should be a person with good knowledge of the uses and physical characteristics of the property, such as a property manager, building manager, the chief physical plant supervisor, or maintenance supervisor.

Complete pages 1 through 3. If applicable, provide information described in subsequent pages. If additional pages for response are necessary, please attach them to this form.

Please sign your name and print your name and the date below. By signing you state that the information you provided herein is accurate to the best of your knowledge.

Permits required?	Location:	Permit No. & Exp. Date:		
Is/are there spray paint booth(s) located at t are changed, disposal method, and whether			Yes 🗌	No 🗌
5.2.5 Water Intrusion Are you aware of any current water leaks?			v . 🗆	[7]
			Yes	No 🖳
Are you aware of any past water leaks?			Yes	No 🖳
Is/are the building(s) air conditioned?			Yes 🖳	No 🗌
Is mold visible in the building(s)? None	Knowh		Yes 🗌	No 🗌
Is there a pool or other water features (such	as a fountain) in the building(s)?		Yes 🗌	No 🕝
Are the bathrooms and dryers (if applicable)	vented to the exterior?		Yes 🗌	No 🗌
Have there been reports of illness due to a problems at the property?	ir quality, or any indoor air quality	or ventilation	Yes 🗌	No 🗗
Does property management have a mold response plan?			Yes 🗌	No 🕒

Please attach water intrusion documentation, including a mold response plan, mold handling plan, or laboratory results from mold samples collected at the property.

APPENDIX E QUALIFICATIONS OF THE ENVIRONMENTAL PROFESSIONAL(S)

VALENTIN CONSTANTINESCU SENIOR PROJECT MANAGER

EPA-COMPLIANT ENVIRONMENTAL PROFESSIONAL (40 CFR PART 312) M. S. ENGINEERING GEOLOGY AND GEOPHYSICS – UNIV. OF BUCHAREST-ROMANIA, 1980

Mr. Constantinescu currently serves as an ALFA Senior Project Manager. Mr. Constantinescu served as a Geophysicist and Project Leader for the Institute of Geology and Geophysics as well as the Geologic and Geophysical Prospecting Company in Bucharest, Romania from 1980-1990. In 1990 Mr. Constantinescu started work as a Geologist for Uriah, Inc. in Livermore, California. From 1990-2009 he served as a Senior Project Manager, Environmental Assessor and Project Geologist in California for Delta Consultants, Wallace-Kuhl and Associates, Inc., ALFA Environmental Remediation Services and Aqua Science Engineers, Inc. For seven years he also provided litigation support for a highly VOC contaminated site in Sunnyvale, California. In addition to his work with ALFA, Mr. Constantinescu has served as a Project Manager for ADR Environmental Group, Taber Consultants and Nova Consulting managing several VOCs and LUFT sites, as well as, performing Phase I and II ESA investigations.

Mr. Constantinescu's field experience includes: Hundreds of soil borings, soil, groundwater, and soil-vapor sampling, groundwater monitoring wells, field geology (including mapping), geophysics (seismic for oil explorations, magnetotellurics and electromagnetic), exploratory and remedial excavations, groundwater extraction wells, and pump tests. Mr. Constantinescu also has experience with designing, permitting, installing, and operating remediation systems.

Mr. Constantinescu possesses solid experience and professional strengths in all aspects of environmental consulting including supervising and project management at a large number of contaminated sites (recently 35 LUFT sites for ConocoPhillips) and VOCs, Chromium VI, and Cyanide remediation projects for private clients and large projects for the Department of the Navy, U.S. Army, BRAC, and USACE. Mr. Constantinescu has served as a ALFA Project Manager since 1992.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1

RCRA-LQG site within approximately 0.25 miles of the target property.

RITE AID #6033 EPA ID:: CA0001007046	680 S STATE ST	N 1/8 - 1/4 (0.127 mi.)	C14	46

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-SQG site within approximately 0.25 miles of the target property.

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 03/25/2019 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there are 6 ENVIROSTOR sites within approximately 1 mile of the target property.

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there are 4 SWEEPS UST sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/25/2019 has revealed that there are 2 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

A review of the EDR MGP list, as provided by EDR, has revealed that there is 1 EDR MGP site within approximately 1 mile of the target property.

Lower Elevation	Address	Direction / Distance	Map ID	Page
PG AND E GAS PLANT U	W SIDE LESLIE AT PER	NNE 1/2 - 1 (0.560 mi.)	O61	193

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto

site within approximately 0.125 miles of the target property.

Equal/Higher Elevation	Address	Direction / Distance	Map ID	Page

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste, RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Cleanup Program Site

Case Worker: ZZZ

Local Agency: Not reported RB Case Number: 1NMC378 File Location: Regional Board

Potential Media Affected: Aquifer used for drinking water supply, Soil Potential Contaminants of Concern: Benzene, Diesel, Toluene, Gasoline

Site History: This site formerly contained a gas station and a petroleum fuel bulk

plant. Petroleum products have impacted soil and groundwater at the site. Excavation of impacted soils occured during rebuilding of the Rite Aid store. Groundwater monitoring indicated limited impacts. This case and the related ARCO #6099 case were closed in 2014.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and

corrective action activities required under RCRA.

Case Worker: ZZZ
RB Case Number: 1TMC542

Local Agency: MENDOCINO COUNTY
File Location: Regional Board
Local Case Number: Not reported
Potential Media Affect: Under Investigation

Potential Contaminants of Concern: Gasoline

Site History: On September 4, 2002 one 10,000-gallon and one 8,000-gallon

underground storage tanks (UST) used for storage of gasoline and the associated tank system were excavated and removed from the property. The property is no longer being used as a gasoline station. Soil samples indicated a release of petroleum hydrocarbons. Subsequent investigation has demonstrated the site meets the case closure criteria specified in the State's Low Threat Underground Storage Tank

Case Closure Policy.

Potential Media Affect: Aquifer used for drinking water supply

Potential Contaminants of Concern: Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline Site History: The Geotracker record for this site contains information on

investigation and cleanup activities for both the Chevron #9-1240
/Ernies site, located at 998 South State Street, and a separate, but adjacent, site called O'Hair & Redwood Oil (1NMC067), located at 100
Observatory Road, Ukiah. The west parcel, O'Hair & Redwood Oil

(1NMC067), contained 9 above ground storage tanks (ASTs) and operated as a Chevron Bulk Petroleum Plant from the 1950's to 1981. The ASTs were removed in 1988. The east parcel, Chevron Ernies (1TMC007), contains a former (pre-1971) service station, in the south, and an active service station, in the north. A 1,000-gallon waste oil tank was removed in 1999. Soil and groundwater on the east parcel (Chevron/Ernies) is contaminated with TPH-gasoline, TPH-diesel, TPH-motor oil, BTEX chemicals and the fuel oxygenates MTBE, TBA and

TAME.

Case Worker: PBN

Local Agency: MENDOCINO COUNTY

RB Case Number: 1NMC067 File Location: Regional Board

Potential Media Affected: Aquifer used for drinking water supply

Potential Contaminants of Concern: Diesel, Gasoline

Please refer to Case Number 1TMC007, Chevron #9-1240/ Ernies, located Site History:

at 998 South State Street, Ukiah, for information about this site. Petroleum hydrocarbon discharges from above ground storage tanks (ASTs) at this site (100 Observatory Road) is co-mingled with UST discharges at the Chevron/Ernies site. Therefore, to minimize duplicity of work, information related to the investigation and cleanup of both sites have been combined and can be found in Geotracker at Chevron #9-1240/ Ernies. The parcel at 100 Observatory Road is adjacent and west of the Chevron/Ernies site. Historically,

the site at 100 Observatory Road contained 9 ASTs and operated as a Chevron Bulk Petroleum Plant from the 1950's to 1981. The ASTs were removed in 1988. Soil and groundwater at 100 Observatory Road is contaminated with TPH-diesel, TPH-gasoline and benzene.

Click here to access the California GeoTracker records for this facility:

Potential Contaminants of Concern: Total Petroleum Hydrocarbons (TPH)

Site History: Formerly, there were two USTs located adjacent and north of the

> on-site commercial building. One UST was a 350-gallon, single walled, gasoline tank. This tank was removed in 1998. No release of contaminates was associated with this tank. In 2011, a second UST tank, used for heating oil, was discovered adjacent to the first tank. The second tank was removed in 2011. Mendocino County noted holes in the bottom of the tank and reported strong odors in soil at 9 feet during tank removal. Two soil samples collected at both ends of the tank pit. A soil, soil vapor and groundwater investigation was performed. Based on investigation results, the RWB closed the site under the SWRCB's Low Threat UST Closure Policy on 3/27/2017.

Potential Media Affect: Aquifer used for drinking water supply

Potential Contaminants of Concern: Diesel, MTBE / TBA / Other Fuel Oxygenates, Gasoline

Site History: This is an active service station. Formerly closed in 2002 (Ultramar,

Case No. 1TMC060), this site was reopened as USA Gas on April 12, 2004. Discharges to soil and groundwater contain TPH-gasoline,

Potential Media Affect: Aquifer used for drinking water supply

Potential Contaminants of Concern: Gasoline

Site History: In October 1996 three fuel UST were removed from the site - one

7,500- and one 5,000-gallon fuel (gasoline and diesel) storage tanks and one 550 -gallon waste oil tank. During tank removal it was determined that these tanks leaked. Subsequent site environmental investigation included installation of three monitoring wells and numerous soil borings. Two additional wells were installed at this site to monitor groundwater plume associated with a release at 300 South State Street. This site was closed in May 2000. In January 2004 approximately 2,076 tons of impacted soil was removed from the site.

Since that time groundwater montioring has shown low to no concentrations of chemicals of concern in the groundwater.

Environmental Interest/Information System

California Hazardous Waste Tracking System - Datamart (HWTS-DATAMART) provides California with information on hazardous waste shipments for generators, transporters, and treatment, storage, and disposal facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifes sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006 Date Data Arrived at EDR: 03/01/2007 Date Made Active in Reports: 04/10/2007

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing

In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

LOS ANGELES CO LF METHANE: Methane Producing Landfills

This data was created on April 30, 2012 to represent known disposal sites in Los Angeles County that may produce and emanate methane gas. The shapefile contains disposal sites within Los Angeles County that once accepted degradable refuse material. Information used to create this data was extracted from a landfill survey performed by County Engineers (Major Waste System Map, 1973) as well as historical records from CalRecycle, Regional Water Quality Control Board, and Los Angeles County Department of Public Health

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Elevation: 621 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5604920 UKIAH, CA

Version Date: 2012

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

- 1. Groundwater flow direction, and
- 2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General East

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

Additional Panels in search area: FEMA Source Type

06045C1513F FEMA FIRM Flood data

NATIONAL WETLAND INVENTORY

NWI Quad at Target Property Data Coverage

NOT AVAILABLE YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

LOCATION GENERAL DIRECTION

MAP ID FROM TP GROUNDWATER FLOW

Not Reported

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: URBAN LAND

Soil Surface Texture:

Hydrologic Group: Not reported

Soil Drainage Class:

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

No Layer Information available.

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon

Source: Department of Public Health

Telephone: 916-210-8558 Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency

(USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at

private sources such as universities and research institutions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

EPA Radon Zones Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor

radon levels.
